DETAILED ACTION

Claims 1-15 are currently pending in the instant application and are subject to the following new lack of unity requirement.

Election/Restrictions

Restriction is required under 35 U.S.C. 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Claims 1-15 are drawn to more than one inventive concept (as defined in PCT Rule 13), and accordingly, a restriction is required according to the provision of PCT Rule 13.2

PCT Rule 13.2 states that the international application shall relate to one invention only or to a group of inventions so linked as to form a general inventive concept (requirement of unity of invention).

PCT Rule 13.2 states that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

Due to the numerous and widely divergent variables in the compound of formula (I), for example R, R1, R2, R3, etc., a precise listing of inventive groups cannot be made. The following groups are exemplary:

Group I: Claims 1-15 drawn to products and methods of using the compound of formula (I), wherein R is C(=NH)-NH₂, R1 is unbranched or branched alkyl having 1-20 carbons; R2 is phenyl with is monosubstituted by S(O)_pA; R3 is H; R4 is CHal₃, and the compound of formula (I) is used for the treatment of arteriosclerosis.

Group II: Claims 1-15 drawn to products and methods of using the compound of formula (I), wherein R is C(=NH)-NH₂, R₁ is Ar; Ar is phenyl; R₂ is phenyl with is monosubstituted by S(O)pA; R₃ is H; R₄ is CHal₃, and the compound of formula (I) is used for the treatment of arteriosclerosis.

Group III: Claims 1-15 drawn to products and methods of using the compound of formula (I), wherein R is C(=NH)-NH₂, R₁ is Ar'; Ar' is (CH₂)_n-Ar; Ar is phenyl; R₂ is phenyl with is monosubstituted by S(O)pA; R₃ is H; R₄ is CHal₃, and the compound of formula (I) is used for the treatment of arteriosclerosis.

Group IV: Claims 1-15 drawn to products and methods of using the compound of formula (I), wherein R is C(=NH)-NH₂, R₁ is unbranched or branched alkyl having 1-20 carbons; R₂ is phenyl with is monosubstituted by S(O)pA; R₃ is H; R₄ is O(C=O)A; A is H, and the compound of formula (I) is used for the treatment of arteriosclerosis.

Group V: Claims 1-15 drawn to products and methods of using the compound of formula (I), wherein R is C(=NH)-NH₂, R₁ is unbranched or branched alkyl having 1-20 carbons; R₂ is

phenyl with is monosubstituted by S(O)pA; R₃ is H; R₄ is , and the compound of formula (I) is used for the treatment of arteriosclerosis.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Again, this list is not exhaustive as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, applicant may choose to elect a single invention (a product or a method of use of said product) by identifying another specific

Art Unit: 1626

embodiment, i.e. another value for R, R1, R2, R3, etc..., not listed in the exemplary groups of the invention and examiner will endeavor to group the same.

The claims herein lack unity of invention under PCT rule 13.1 and 13.2 since, under 37 CFR 1.475(a) the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The technical feature of the instant claim(s) is the semicarbazide, which does not define a contribution over the prior art (as can be seen by Mederski et al., U.S. Pat. Num. 6,849,626, formula (I) of Claim 1, Column 31), which corresponds to applicants formula (I). The variables on the semicarbazide compound vary extensively and when taken as a whole result in vastly different compounds.

Accordingly, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper. Additionally, the vastness of the claimed subject matter, and the complications in understanding the claimed subject matter imposes a serious burden on any examination of the claimed subject matter.

A telephone call was made to Attorney Anthony J. Zelano on 09/11/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
